

Printer Instructions

SYSCO Brand Packaging Graphics Development

- **Printing companies that work with SGS and print SYSCO packaging must complete one of the SGS forms, Non-Corrugated or the Corrugated Printer Information Form. (If SGS already has the press specifications on file, please disregard these forms)**
- **Use one form for each printing press you use to print SYSCO packaging.**
- **Gather hardcopy (or PDF) die layout specifications of each SYSCO structure you print.**
- **Gather electronic files (EPS Format preferred) of each die-line specification.**
- **Send your completed forms and die specifications to the SGS representative that you are working with.**

Southern Graphic Systems, Inc. has been selected by SYSCO to provide each Supplier with printing plates according to your printing requirements. A SGS representative will contact you before the artwork separation process begins for item specific information (cylinder size, color rotation, etc.). Each Printer will be sent a PDF of the artwork for comments or concerns prior to the color separation process.

If you have any questions or concerns, please contact SGS.

For SYSCO products produced in the United States:

Kathy Johnston, 281-584-2889, Fax: 281-584-5950, email: johnston.kathy@corp.sysco.com
